

# Grant Management Software under your control – without compromise

**SmartSimple Cloud for Grants Management** empowers forward-thinking foundations with a robust technology platform. With integrations that support easy connections to various data sources, including Salesforce CRM, and advanced security measures to protect your entire user community, SmartSimple Cloud gives you control without compromise.

## Connect and integrate with ease

Sometimes the data you need exists outside your grant management system. SmartSimple Cloud provides a robust integration layer enabling various options to enrich your data. One-click integrations, APIs, flexible mediated file transfer, and OData, offer organizations a powerful integration environment. Integrations are not just limited to consuming data from external sources but include automated data export functionality to feed your ERP, CRM, and other systems.

## Synchronize with Salesforce

Have you deployed, or are you considering, Salesforce CRM? Don't compromise your investment in Salesforce by selecting a GMS that lacks compatibility. SmartSimple Cloud with Salesforce CRM enables clients to choose a best-of-breed approach for their CRM and GMS solutions. Our clients are deploying SmartSimple Cloud with Salesforce to sync Organizations and Contacts records, to empower their teams with the information they need without switching between platforms, and to reduce ad-hoc data requests and manual uploads. SmartSimple is a Salesforce Partner.

## Secure your entire community

A security failure that originates from your external community can be just as costly as one from within your organization. Protecting your external stakeholders can be difficult. Standard email and password-based security are no longer enough. Multi-factor authentication (MFA) extended to your grantees, applicants, external reviewers, and other stakeholders provides additional security benefits to your organization. SmartSimple Cloud offers MFA, trusted device settings, and dozens of other security options to protect your organization and lower the chances of data theft, leakage, and hacks.

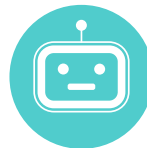

**Cloud-based**

**Secure**

**Low code**

**Automated**

**Cost effective**

**Quick to set up**
